BEAR CREEK REDWOODS PRESERVE

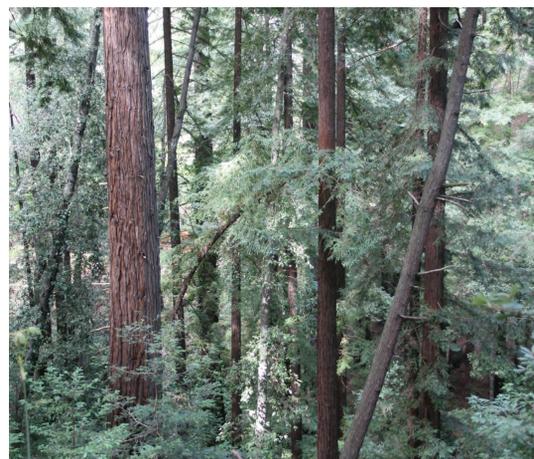

BEAR CREEK REDWOODS PRESERVE

THE VISION

“Hosting Santa Clara County’s best preserved, second growth redwood forest, **Bear Creek Redwoods Open Space Preserve** contains a rich historical past that has served to influence and shape the surrounding landscape. The preserve shall provide the public with a South Peninsula **opportunity for tranquil nature study and exploration** in a cool, heavily forested canopy environment.

The **stewardship** of this public open space preserve shall be of highest priority, followed by an **extended trail system** with greater access. Focus will be placed on **restoring native habitats**; reducing erosion and sedimentation for **improved water quality**; interpreting the land’s historical and cultural resources; providing new staging opportunities to allow for **greater public access**; and expanding the interior trail connections within the Preserve.”

BEAR CREEK REDWOODS PRESERVE

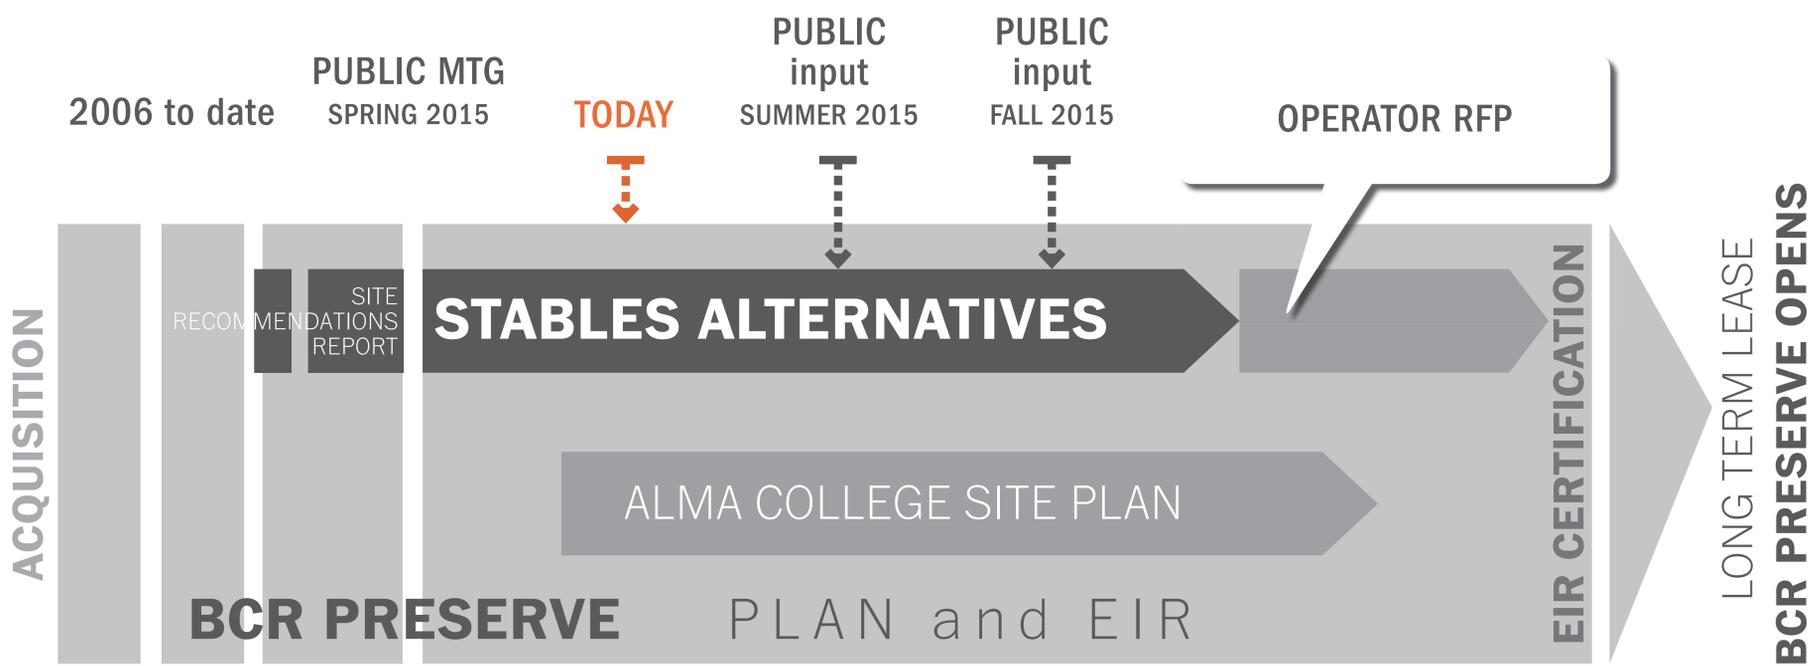

THE PLANNING PROCESS

PLANNING PROCESS PURPOSE

Building on **previous planning efforts**, develop a **comprehensive plan for public access** at Bear Creek Redwoods Preserve to provide for ecological recreation while protecting and enhancing natural and cultural resources.
