

DATE: August 9, 2023

MEMO TO: Board of Directors

THROUGH: Ana Ruiz, General Manager *se*

FROM: Deborah Bazar, Management Analyst II, Visitor Services  
Matt Anderson, Chief Ranger, Visitor Services

SUBJECT: Ranger Public Safety Report for Calendar Year 2022

---

## SUMMARY

This report provides a summary of the enforcement and incident response activities Rangers initiated or responded to on and off Midpeninsula Regional Open Space District (District) lands during calendar year 2022. Historical information about the preceding four years is included for perspective. The total number of non-parking violations declined during COVID and have remained flat since then. The number of parking violations peaked during COVID and have returned to pre-COVID levels with the exception of a significant increase of no parking violations at lower Purisima Creek Open Space Preserve. Incident responses went up while fire incidents were down in 2022, with a combined 22% increase compared to the 5-year average. Of all the incident responses, 28% occurred outside District lands, with Rangers primarily assisting other response agencies with public roadway accidents.

## DISCUSSION

Information for this report was generated from two sources: 1) the Incidents Database, which was placed in service for data collection in January 2010 and retired in January 2022, and 2) the Omnigo software platform, which was launched in January 2022 as the new repository for ranger records. The two systems operate and capture/query records differently. Visitor Services Department staff invested significant effort to verify the information across the platforms to ensure the two datasets were as consistent as possible.

The focus of law enforcement contacts made by Rangers is the protection of resources and public safety. Each contact that a Ranger makes is considered educational in nature regardless of the final action taken. Actions taken include verbal and written warnings, citations, and on rare occasions, a physical arrest. Physical arrests, if they occur, are turned over to the law enforcement agency with jurisdiction for transportation and booking. Many violations can be addressed and corrected with a verbal warning and thus represent a significant effort by Rangers to educate visitors and gain compliance.

The number of recorded violations, including parking violations, has declined since 2018, with an exception in 2020 when parking violations significantly increased primarily due to high

visitation experienced during the pandemic. Much of the dip in recorded non-parking violations for 2020 can be attributed to direction provided to Rangers, to limit their direct contact with visitors to only safety or egregious violations. This safety protocol aimed to minimize the risk of COVID-19 exposure to protect Rangers and the public and to reduce potential impacts to staffing due to illness. Veteran Rangers have also shared that they attribute fewer violations to more responsible land use, especially amongst bicyclists, particularly for helmet compliance.

The number of recorded violations depends both on the number of actual violations occurring and Ranger time spent enforcing regulations. Ranger staffing is key to consistent enforcement, providing a highly visible, proactive presence and response in District preserves. During 2021 and 2022, Rangers were not fully staffed, making consistent enforcement efforts challenging as the District continued to recruit, train, and develop new Rangers to perform their duties independently. This effect is magnified when the District is at minimum staffing since on-duty staff concentrates their efforts on incident response and checking high volume use areas, typically limiting foot patrols and the ability to focus on less visited areas with potential violation issues.

For this report, the charts, tables, and summaries only include contacts that resulted in some form of written record, such as an incident report, written warning, citation, or mutual aid assistance. One of the advantages of the new Omnigo system is that it allows data entry in the field, making it easier to record verbal warnings that make up the majority of all Ranger contacts for violations of District ordinances. Verbal warnings were not captured electronically prior to the implementation of Omnigo in 2022, and therefore are not included in this report to ensure consistent comparison between years. For future reports, verbal warnings will be incorporated in the enforcement section to provide a more holistic picture of Ranger efforts.

A high-level review of 2022 verbal warnings data reflects that the top violation categories resolved with verbal warnings area: *After Hours* (851), *Dogs Prohibited* (385), and *Trail Use Speed Limit* (250). A complete list is provided in Attachment 1.

Future reports will also include an analysis of Ranger activity logs. Ranger activity logs are completed daily by Rangers in Omnigo to capture all daily activities or tasks performed. An analysis of the cumulative data will be performed to reflect the percent of time spent on tasks and the number of occurrences.

#### District and Non-District Ordinance Violation Summary

Calendar year 2022 saw a 9% decrease in the total number of violations recorded (District ordinances, and non-District Ordinances, excluding parking violations) in comparison with the 5-year average. See Table 1 and Chart 1 below. Violations of District ordinances represent the majority of reportable issues. The most common District violations (excluding parking) continue to be *After-Hours Use*, *Dog Violations*, and *Entry into Closed Areas*. In addition to District ordinances, there are specific local, state, and federal laws that can be enforced by Rangers on or adjacent to District lands, including Santa Clara County (SCC) Park Ordinances in any SCC Park that is contiguous to District lands or across the street from District lands. Violations of these non-district ordinances fall under *Other Crimes* as illustrated in Attachment 2, Table 2. The second most common non-district ordinance violation is the reporting of *Auto Burglaries*. The frequency of each violation is illustrated in Attachment 2, Tables 1 and 2.

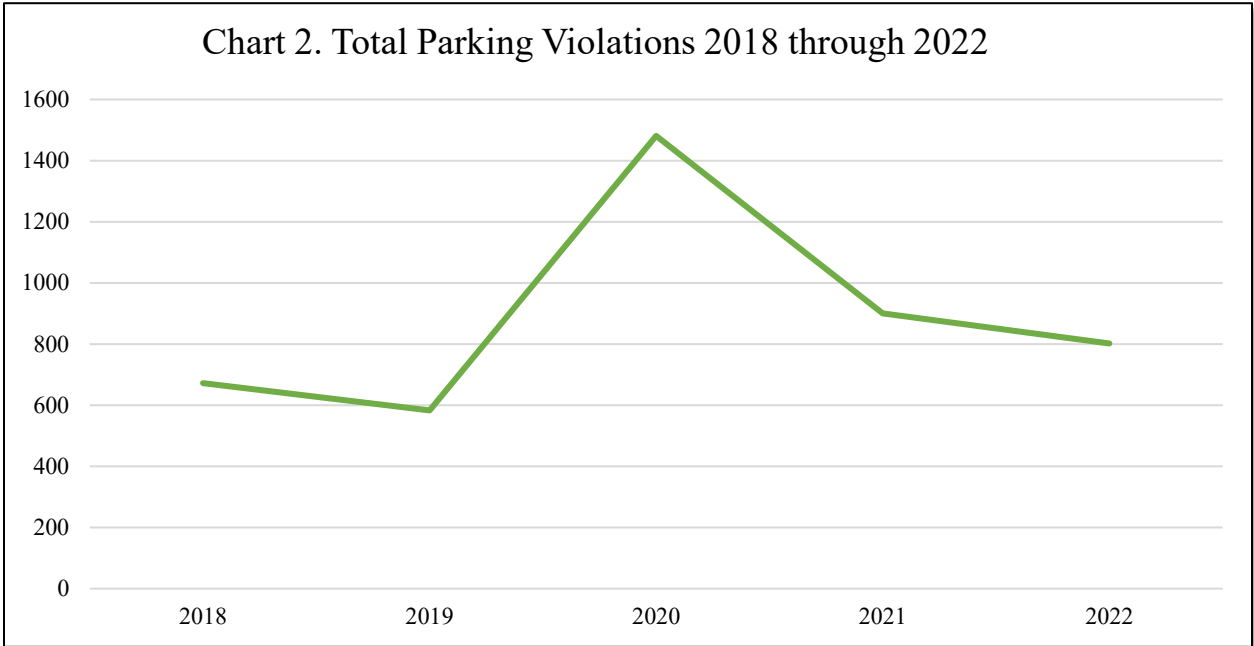

<b>TABLE 1. VIOLATION TYPE, EXCLUDING PARKING VIOLATIONS</b>	<b>2018</b>	<b>2019</b>	<b>2020</b>	<b>2021</b>	<b>2022</b>	<b>5-Year Average</b>	<b>2022 %Difference from 5-Year Average</b>
District ordinances	1294	1111	875	977	954	1042	-8%
Non-District ordinances	88	118	51	68	64	78	-18%
<b>Total</b>	<b>1382</b>	<b>1229</b>	<b>926</b>	<b>1045</b>	<b>1018</b>	<b>1120</b>	<b>-9%</b>

Recorded non-parking violations were predictably down in 2020 as Rangers were directed to minimize detentions and direct contact with visitors to reduce potential exposure to COVID-19.

Parking Violations

Chart 2 below displays the total number of parking citations by year, from 2018 through 2022. There were 802 parking citations issued in 2022, which represent a 10% decrease from the 5-year average. See Attachment 2, Table 3 for more information.

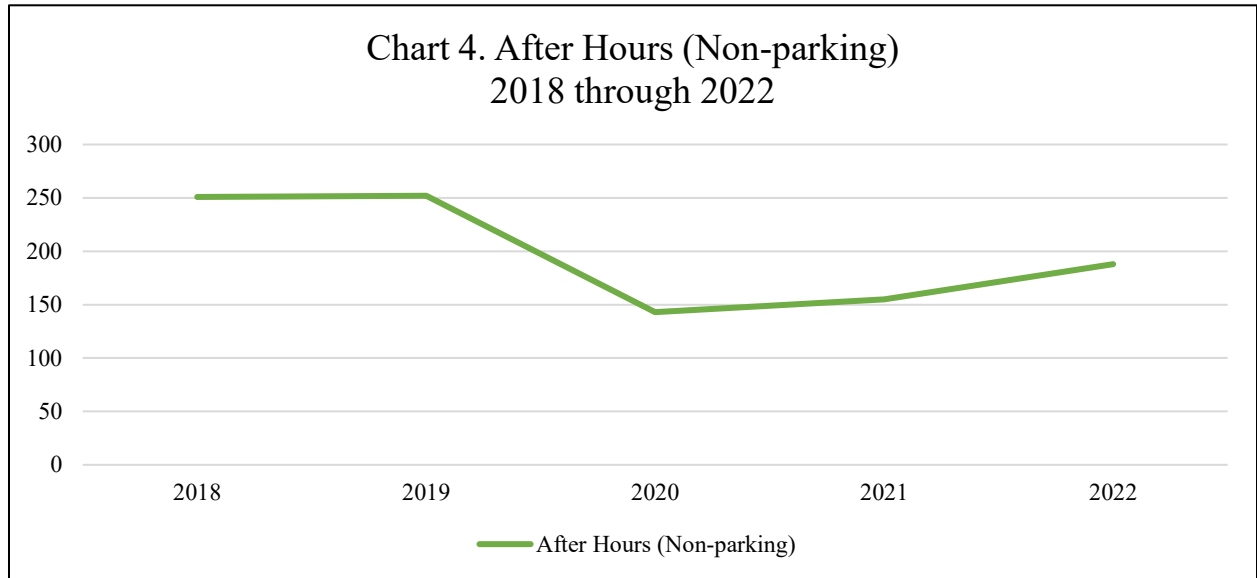

The most frequent District-ordinance parking violation in 2022 continues to be *After Hours Parking*, with most of them (138, 44%) occurring at Rancho San Antonio County Park. While this is typical, the percentage is lower than most previous years. See Attachment 2, Chart 1 for details on trends of the percentage of afterhours parking violations issued at Rancho San Antonio County Park.

If non-District parking ordinances are considered, the most frequent parking violation in 2022 was for parking in a no-parking zone (259, 81%). The majority of those (193, 75%) occurred at Purisima Creek Redwoods along Purisima Creek Road. This was due to the enforcement of a no-parking zone established in cooperation with San Mateo County at the request of residents to address safety concerns along the narrow road created by roadside parking because of the high visitation. The significant increase in citations issued on Purisima Creek Road in recent years compared to previous years can be seen below in Chart 3.

After Hours (Non-parking)

Chart 4 below shows the total after hours (non-parking) violations from 2018 through 2022. There were 188 after hours citations issued, which is a 5% decrease from the 5-year average. See Attachment 2, Table 1 for more information.

Closed Areas

The biggest change in closed area violations is related to the opening of Bear Creek Open Space Preserve in 2019 and the Alma Cultural Landscape in the preserve in 2022. Providing legitimate planned access has led to a decrease in closed area violations.

Chart 5 below shows the closed area violations according to top three locations with the highest average violation from 2018 through 2022, with all the other preserves summed for comparison. There were 100 closed area violations issued in 2022, which was down 43% from the 5-year average. See Attachment 2, Table 4 for more information.

### Dog Violations

Chart 6 shows the total dog violations for 2022, which totaled 337, a 1% increase from the 5-year average. The majority of the dog violations in 2022 were for *dog off-leash* (179), a 6% increase from the 5-year average. The other offense was *dogs in a prohibited area* (158), a 3% decrease from the 5-year average. See Attachment 2, Table 5 for more information.

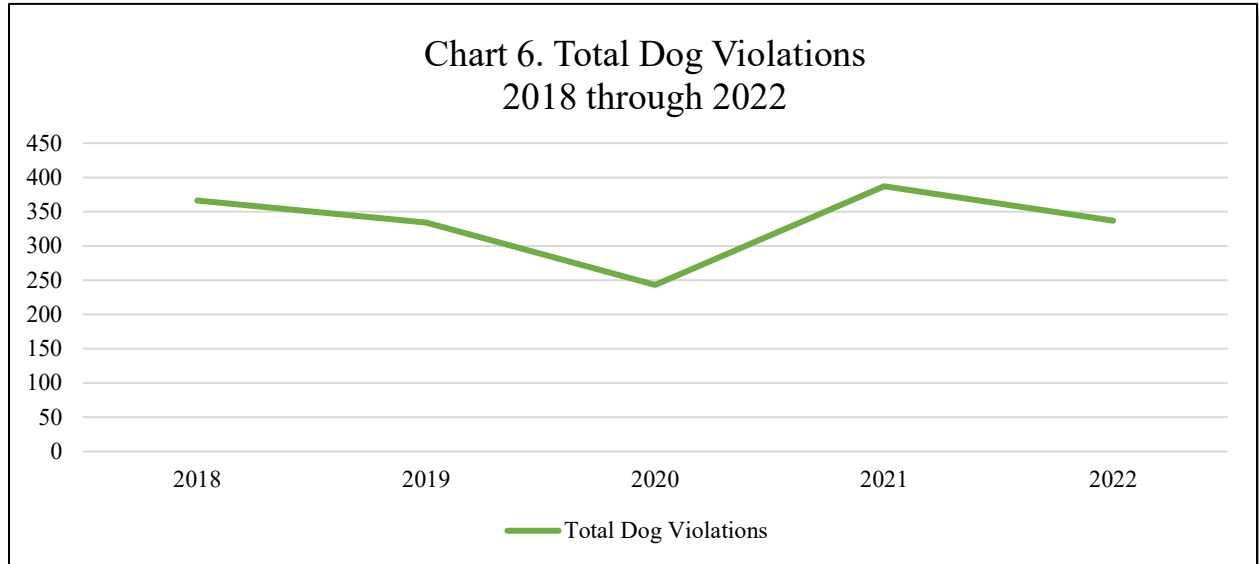

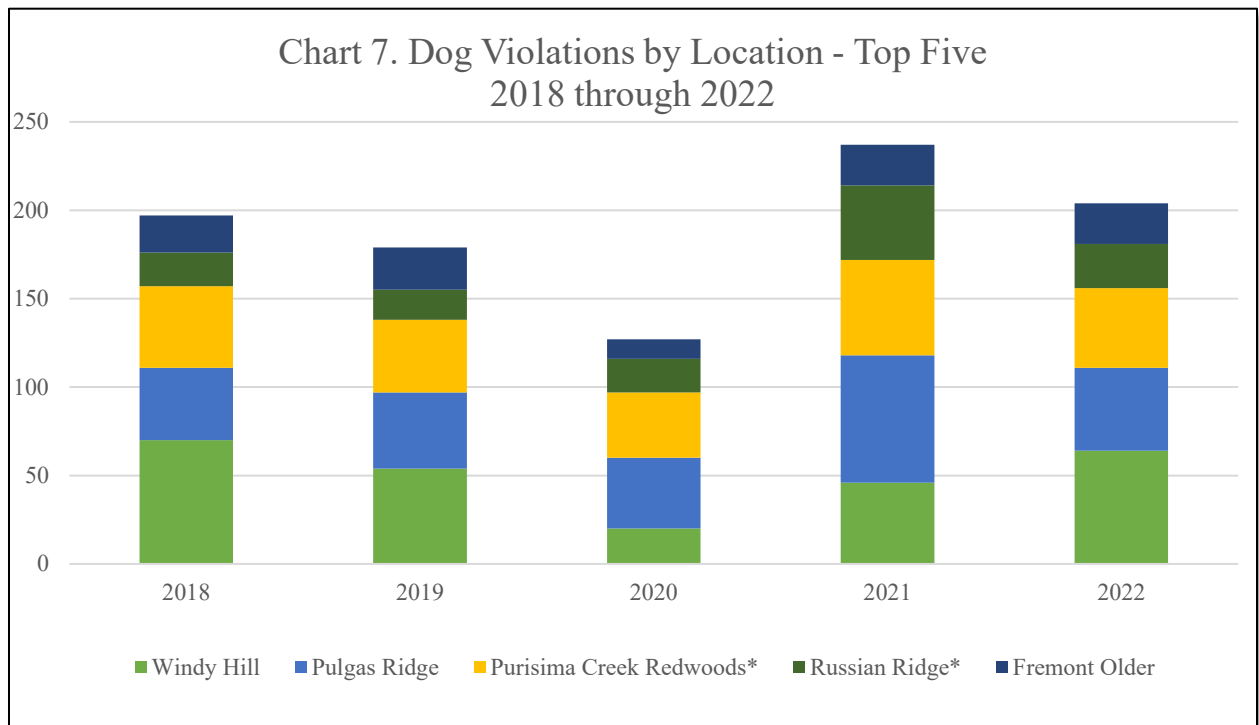

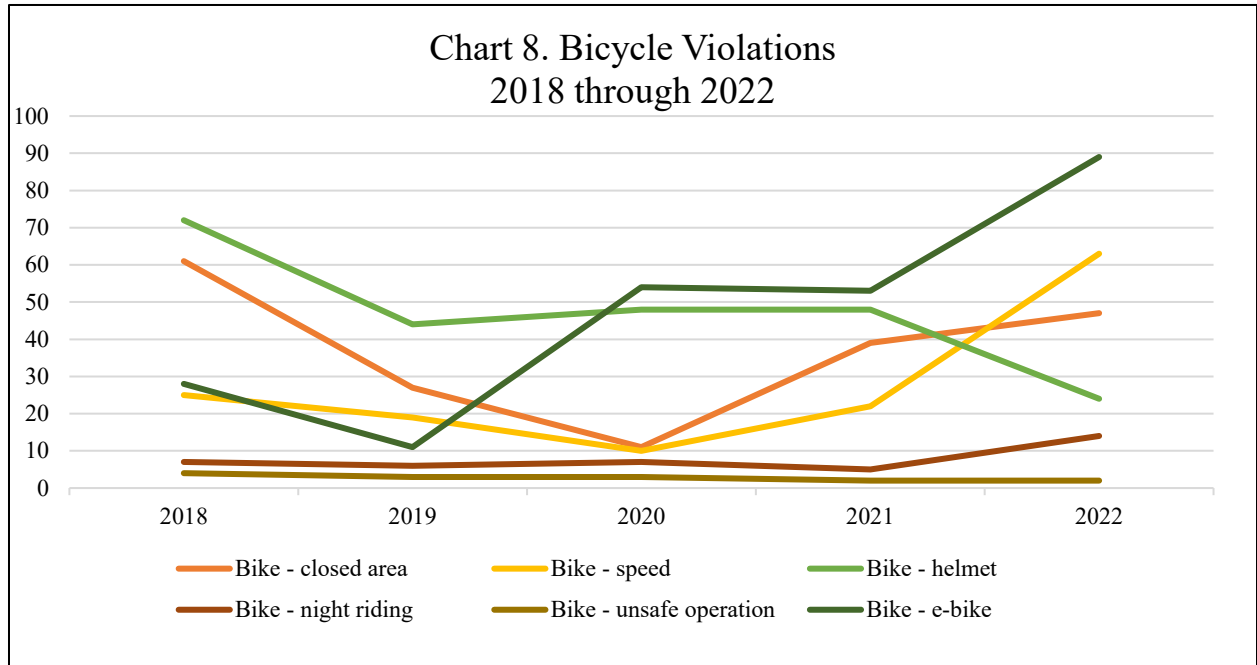

Chart 7 below shows the total dog violations according to frequency at the preserves with the five highest average violations. The preserves with asterisks next to the names do not allow dogs. See Attachment 2, Table 6 for details.

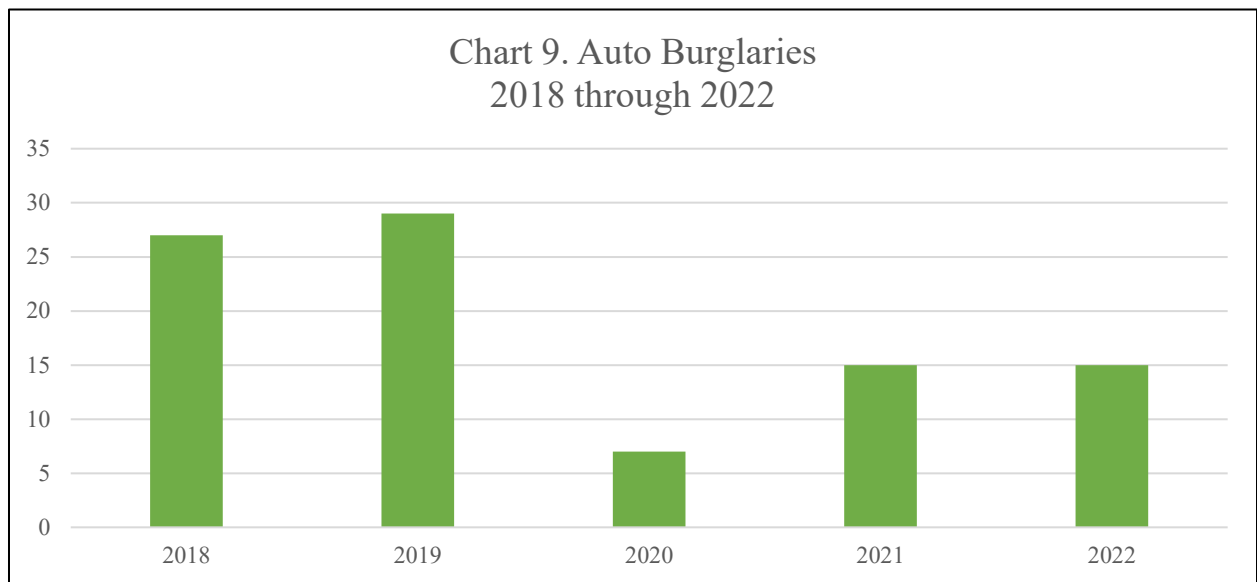

### Bicycle Violations

Chart 8 below shows the distribution of bicycle offenses by violation since 2018. Total bicycle violations for 2022 (239) increased by 41% from the 5-year average, with the most frequent violation being *e-bike violations* (89, 37%). See Attachment 2, Table 7 for more information. Rangers also report many e-bike contacts do not result in a citation or warning because the rider states they are using the device due to a mobility disability (under the District’s OPDMD policy).

### Auto Burglaries

Chart 9 shows the total auto burglaries by year. Auto burglaries in 2022 (15) decreased 19% from the 5-year average. See Attachment 2, Table 8 for a list by location.

The majority of auto burglaries during 2022 occurred at Rancho San Antonio County Park (53%). See Attachment 2, Chart 2 for details on trends of the percentage of burglaries occurring at Rancho San Antonio County Park since 2018.

## Incident Response

The total number of responses to non-fire incidents (152) and fire incidents (9) was 161 in 2022, a 22% increase from the 5-year average of 132 (see Attachment 2, Table 9 for details).

Non-fire incidents were up 25% from the 5-year average of 121. The cause of the increase in non-fire incidents is unclear. However, the most prominent increase is in vehicle accidents of which 26 of the 44 were off District lands. Fire incidents were down 20% from the 5-year average of 11.

A total of 43 of 152 non-fire incidents and 3 of 9 fire incidents occurred off District land in 2022. Of the 109 non-fire incidents occurring on District land, 18 were vehicle accidents, 21 were bicycle accidents, 18 were hiking/running accidents, 2 were equestrian accidents, 2 were search and rescue, 44 were other medical aid, and 4 were other (e.g., animal incidents, traffic control).

Of the fire incidents on District lands in 2022, two (2) were live fires, two (2) were evidence of fires, one (1) was a downed power line, and one (1) was a response to a report of a strong smoke odor, though the source of the odor was unable to be located. See Attachment 2, Table 10 for more information.

Rangers responded to one (1) confirmed fatality during 2022, caused by a vehicle accident off District land.

## **NEXT STEPS**

This report and analysis are used by command staff and supervisors to assist in identifying patrol and outreach priorities to address areas of concern. Areas of focus will include continued outreach for multi-use trail awareness and education, consistent education and enforcement of e-bike use, dogs off leash, closed area patrols, and bicycle speed.

The District is in the midst of two Ranger recruitments to fill all existing vacancies, including two overfill positions approved by the Board for FY22 and FY23. The intent of the positions is to modulate the impact of staff vacancies and leaves of absence. Full staffing will provide for more consistent education, enforcement, and incident response.
